

Variance Decomposition of Coupling Onset Timing (6 domains, 4 coupled topologies, 30 seeds each)

(a) Variance Decomposition

(b) Statistical Tests

Kruskal-Wallis: onset by TOPOLOGY
H = 315.492
p < 0.001 ***

Kruskal-Wallis: onset by DOMAIN
H = 1.086
p = 0.9553 (n.s.)

Interpretation:
STRUCTURAL: topology governs
coupling onset timing.
